

EARL, THE SQUIRREL

I have a large, bushy
tail.....

My ears and eyes are
quite small.....
but I am very alert.

My nose..... helps me find nuts and berries or even some sunflower seeds. I carry some of my food in my cheeks until I can bury it or put it in a hole in the tree.

My little paws have little claws..... They help me to climb up to the very top of the tallest tree. They also help me dig so I can bury my nuts in the ground. Sometimes I forget where I bury a nut and it grows into a tall tree. I am a very busy SQUIRREL during the Summer and Fall, because I am storing away food. My store of nuts, berries, and seeds will feed me all Winter.
